Applying behavioral science to build wealth

AthenaInvest takes a unique approach to investment management using behavioral factors to build innovative investment solutions.
Markets aren’t efficient...

That’s the idea behind AthenalInvest.

The industry leader in Behavioral Portfolio Management, AthenalInvest, employs a patented investment process built on a deep academic foundation, using proprietary research developed and refined over 35 years of interaction with leading academics and institutional managers. This rigorous academic foundation remains central to AthenalInvest’s asset management business today.

AthenalInvest was founded as an equity research firm by C. Thomas Howard, PhD to study the behavior of successful active equity managers. Building on the Nobel Prize-winning research of Daniel Kahneman, Dr. Howard is a pioneer in the application of behavioral finance.

We offer our separately managed account strategies on most platforms and sub-advise for investment companies and institutions.

AthenalInvest is privately owned and headquartered in Greenwood Village, Colorado.
People aren’t rational.

Our Investment Philosophy

Behavioral finance research finds that, despite conventional wisdom, an overwhelming preponderance of investment decisions are driven by emotion.

Athena’s Core Beliefs

1. Markets are dominated by emotional crowds.
   Short-term market movements rarely contain useful information. Overconfident buying and panic selling drive prices.

2. Behavioral research reveals unique opportunities.
   Behavioral price distortions in the market are the norm rather than the exception. Active management can take advantage of these opportunities.

3. In large part, emotions determine investor success.
   Mastering one’s emotions and following a sound financial plan can dramatically improve the chances of avoiding common investor mistakes.

AthenaInvest pioneered a formalized framework to apply behavioral finance principles, known as Behavioral Portfolio Management (BPM). Through BPM, which is geared toward building long-term wealth, we meld the academic rigor of statistical behavioral analysis with real-world investment experience.

C. Thomas Howard, PhD
CEO, Director of Research

Tom is a Professor Emeritus at the Reiman School of Finance, Daniels College of Business, University of Denver, where he has taught courses and published articles for more than 30 years in the areas of investment management and international finance.

His book, Behavioral Portfolio Management, is an insightful treatise on the flaws inherent in modern portfolio theory and the opportunities presented by emotion-driven behaviors of investors. As a thought leader in Behavioral Finance, Tom has spoken at national industry conferences and been featured in industry publications including Forbes, Financial Times and Pension & Investments Europe.
View the market from a behavioral perspective.

Our Behavioral Research

AthenaInvest’s portfolio-building process is informed by the company’s proprietary, patented database, comprising comprehensive fund and stock data going back to 1997. Free of survivor bias, this robust database of managers, holdings and securities allows us to conduct broad investment research on behavioral factors using large data sets over long time horizons.

The Data (March 1997 - March 2019)

<table>
<thead>
<tr>
<th>Count</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>76,942</td>
<td>Mutual Funds &amp; ETFs</td>
</tr>
<tr>
<td>186,667</td>
<td>Global Securities</td>
</tr>
<tr>
<td>176,263,230</td>
<td>Portfolio Holdings</td>
</tr>
</tbody>
</table>

The Results

We have translated this large data set into useful, actionable investment information. In fact, AthenaInvest has been granted U.S. patents for its unique behavioral research outcomes, including:

- **Active Management Categorization** based on stated investment strategy
- **Stock and Fund Ratings** based on investment manager strategy, consistency and conviction
- **Tactical Market Barometers** based on investor relative strategy preferences

Every investment strategy we develop must have a foundation in the academic literature and pass statistical and economic testing using our database.
Planning mitigates emotional mistakes.

Our Planning Approach

While investment management is important, the foundation of successful investing is avoiding behaviors that can sabotage a well-developed plan. It is critical to use needs-based planning to separate short-term needs from longer-horizon growth needs. This helps minimize emotional reactions to market declines.

Expected Returns

We believe that investing in the asset class with the highest expected return for the longest time possible produces the best investment results. Consider the following:

HYPOTHETICAL GROWTH OF $1 MILLION OVER 20 YEARS

<table>
<thead>
<tr>
<th>Asset Class</th>
<th>Return (%)</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>5.5%</td>
<td>$3.0 Mil</td>
</tr>
<tr>
<td>Bonds</td>
<td>7.2%</td>
<td>$4.7 Mil</td>
</tr>
<tr>
<td>Stocks</td>
<td>10.8%</td>
<td>$9.0 Mil</td>
</tr>
</tbody>
</table>

Figures shown are based on the average annual return of all 20-year periods from January 1, 1951 - December 31, 2015 and include the reinvestment of dividends and interest. Source: Ibbotson (cash: 30-day Treasury bills; bonds: U.S. long-term government bonds; stocks: S&P 500 Index). Indices are unmanaged and, therefore, have no expenses. Figures shown are past results and are not predictive of results in future periods.

Active Management

In addition, we believe active equity management can add considerable value. A growing number of academic studies confirm excess returns of 4% - 6% annually from truly active management:

- **Active Managers Deliver Alpha if they Remain Truly Active**  
  Amihud and Goyenko, 2008, New York University

- **High Conviction Ideas from the Best Managers Deliver Superior Returns**  
  Cohen, Polk, and Silli, 2009, Harvard University

- **Active Managers Have Skill**  
  Howard, 2015, University of Denver
Athena Managed Accounts

Athena's core investment strategies can be accessed independently or as a diversified behavioral equity portfolio.

PAST PERFORMANCE DOES NOT GUARANTEE OR INDICATE FUTURE RESULTS

1. Utilizing a proprietary blend of PSN Informa’s clients’ top priority performance screens, PSN Top Guns ranks products in six proprietary star categories in over 50 universes. This is a highly anticipated quarterly ranking and is widely used by institutional asset managers and investors. The complete list of PSN Top Guns and an overview of the methodology can be located on www.informais.com.

2. Ranking for 1-Year performance is based upon the Q4 2013 Morningstar SMA database. The ranking may not be representative of any one client’s experience because the ranking reflects composite performance of multiple clients. The ranking may not be considered indicative of future performance and AthenaInvest did not pay to participate in the Morningstar ranking.

3. Barron’s SMA Winner Definition: All Separate Accounts reported in Morningstar are ranked by 3 month performance and the top ten retail and institutional SMAs become Quarterly Winners.
